Weekly
Roundup

WR 5-88

Feb. 3, 1988

The Foreign Agricultural Service of the U.S. Department of Agriculture today reported the following developments in world agriculture and trade.

GRAIN AND FEED

FINLAND To Import Barley. Finland is expected to import about 150,000 tons of barley in 1987/1988, according to the U.S. agricultural counselor in Stockholm, Sweden. This is in direct contrast to past years when Finland exported about 200,000 tons of barley per year. A production shortfall is responsible for this shift in trade position, which could provide an opportunity for the United States to supply feed grains to Finland's traditional customers in Eastern Europe.

OILSEEDS AND PRODUCTS

CHINESE Launch Peanut Marketing Campaign in JAPAN. China is providing U.S.\$600,000 for a peanut marketing effort in Japan. China exports 16,000 tons of processed peanuts to Japan annually, accounting for about 80 percent of Japan's processed peanut imports.

DAIRY, LIVESTOCK AND POULTRY

CHINESE Pork Production Falling. Chinese pork production in 1988 is projected to decline for the second year in a row, according to the U.S. agricultural counselor in Beijing. Production in 1988 is estimated at 17.0 million tons compared to 17.6 million tons in 1987 and 18.0 million tons in 1986. Hog numbers in 1988 are estimated at 323 million head compared to 337 million in 1987. Despite increased supplies of subsidized grain, pork production is not expected to grow until 1989 because of the time lag between breeding herd rebuilding and increased supplies of fed hogs in the market.

HONG KONG'S Imports of U.S. Poultry Surge. Hong Kong's imports of U.S. poultry products in 1987 jumped to an estimated \$65 million, up more than 50 percent from 1986. Imports of both poultry meat, especially frozen chicken parts, and eggs were up significantly due to a combination of increased demand, favorable U.S. prices compared to competing exporters (due to the declining dollar), Targeted Export Assistance (TEA) program activities and an Export Enhancement Program (EEP) for eggs.

Demand for U.S. turkey, duck and cornish game hens was strong in late 1987 as Thanksgiving and especially Christmas are becoming celebrated holidays. In addition, TEA funds paid for a sophisticated promotional campaign using television and posters as advertising media.

DENMARK Reducing Pork Production. Danish pork production for 1988 is projected to fall 4 percent to 1.09 million tons, according to the U.S. agricultural counselor in Copenhagen. Hog numbers at the start of 1988 were down 4 percent to 9.05 million head, with sow numbers off 6.5 percent due to falling pork prices and the high cost of complying with new environmental rules on manure.

WORLD Butter Surplus Remains Problem. Dairy intervention stocks of butter in the European Community (EC) as of mid-January were 920,400 tons. In comparison, uncommitted U.S. butter inventories, held by the Commodity Credit Corporation (CCC) as of January 8, amounted to less than 35,000 tons. Nonfat dry milk stocks in the United States stand at 13,700 tons, compared to 592,100 tons in the EC.

Butter stocks in the EC declined by 34 percent in 1987 after reaching a high of 1.4 million tons. Stocks of nonfat dry milk fell by 30 percent. The imposition of a dairy quota system has been a key factor limiting milk production. Special disposal programs have served to draw down stocks in the butter market.

World prices for nonfat dry milk ranged from \$690 to \$750 per ton in February 1987 and from \$1,025 to \$1,200 per ton in December 1987. Throughout 1987, butter prices were weak but steady. Butter stocks in the EC continued to weigh on the market, even though disposal programs were relatively successful.

WOOD AND WOOD PRODUCTS

U.S. Forest Products Exports Headed Toward Record. The total value of U.S. solid wood exports was nearly \$3.6 billion for January-November 1987, an increase of 32 percent over the same period in 1986. U.S. solid wood export values will likely surpass the previous record of \$3.67 billion set in 1980. Japan, the leading market for U.S. wood products, imported more than \$1.6 billion, an increase of more than 44 percent over the previous year's trading activity. All products except poles, piles and pitprops and hardwood siding experienced solid gains in the first 11 months of 1987 over the same period the year before.

U.S. hardwood lumber exports of slightly more than \$429 million were up about 38 percent over the January-November 1986 trading period. The export value of hardwood flooring was up 84 percent to \$11 million, veneer was up 35 percent to \$100 million, and logs were up 17 percent to \$103 million. Softwood logs, lumber and plywood also experienced impressive gains with increases of 37, 34 and 35 percent, respectively, with shipments valued at \$1.4 billion, \$765 million and \$149 million.

Total U.S. wood products imports were \$5.1 billion, an increase of nearly 5 percent compared to the January-November trading activity for last year. The value of U.S. imports of softwood lumber from Canada totaled \$2.6 billion, down 3 percent from the same period in 1986, while the quantity imported increased 0.02 percent to 13.1 billion board feet.

SUGAR

SOVIET Sugar Production and Consumption Revised Upward. Beet sugar production in the Soviet Union for the 1987/88 harvest is now projected at 9.0 million tons (raw value), up 8 percent from the 8.3 million tons earlier forecast and 3 percent above a year ago. Consumption is now forecast at 14.1 million tons, up 5 percent from the previous forecast and 700,000 tons more than the 1986/87 estimate.

Tass, the official Soviet news agency, citing the government's Committee for Statistics, announced that in 1987 the Soviet sugar beet crop totaled 90 million tons and procurement reached 78.9 million tons. This compares to a total beet crop of 79.3 million tons in 1986 and procurement of 70.7 million tons. The difference between the total beets harvested and procurement reflects mostly post-harvest losses such as transit or storage losses. The Soviet media publishes beet sugar production on a refined basis. Conversion to raw value is made by multiplying refined sugar by 1.087. In 1986, official beet sugar production was published as 8.0 million tons refined value or 8.7 million tons raw value. This year's 9.0-million-ton estimate of sugar (raw value) would be equal to 8.3 million tons refined. The 1987 extraction rate is estimated at 11.4 percent compared with 12.3 percent in 1986. The average extraction rate for the previous three years was 11.6 percent.
